

Press release

Niederweningen, 30 June 2014

Publication of Sustainability Report 2013

Today sees the publication of Bucher Industries' sustainability report 2013. Prepared in accordance with the G3 standard of the Global Reporting Initiative (GRI), the report contains key figures on production, energy consumption, employees and suppliers.

The Group collected data relevant to the key figures at the 31 most important production sites worldwide. These sites account for about 80% of Group sales and more than 90% of all employees. Against the background of a 3% increase in Group net sales in 2013, the rise in energy consumption was lower at 2%, while CO₂ emissions increased at the same rate as sales. The key figures for employees showed little change. The GRI Index is published as a separate document. This can be downloaded, together with the Sustainability Report 2013, from the Bucher Industries website at www.bucherindustries.com/en/node/558. As part of our commitment to sustainability we will not be issuing a print publication.
